(715) 796-2227 Work

**QUALIFICATIONS:** Registered Professional Engineer, State of Wisconsin, Registration Number E-25782; Registered Land Surveyor, State of Wisconsin, Registration Number S-2360. Certification as a Bridge Inspector through the National Highway Institute Training for Inspection of In-service Bridges. A wide variety of experience in many different project types and areas, ranging from preliminary planning through design, construction, project administration, and supervision.

**EMPLOYMENT:**

1/80 - 8/87

**CEDAR CORPORATION**, 604 Wilson Avenue, Menomonie, WI.

Cedar Corporation is a consulting engineering, land surveying firm. My duties included a wide variety of land surveying and engineering related duties ranging from section surveys, property surveys, and right-of-way surveys through highway staking for horizontal and vertical alignment, municipal utilities installation, storm run-off facilities, flood mitigation, sanitary and water supply systems as well as bridge inspections, design of new structures along with construction inspection and testing.

Responsibilities ranging in a wide variety of land surveying and engineering areas beginning with cost estimates and project feasibility studies. Crew Chief in collection of field data needed for design of various projects ranging from right-of-way plats to highway design and design of storm run-off facilities, such as culverts, box culverts, and bridges. Collection of field data and drafting of plans for state approval on all of the above mentioned project types. Design of all the various engineering projects listed from highway design to culverts, box culverts and bridge design. Final plan preparation for bid projects and state approval. Production of specifications for bidding of projects. Also responsible for all phases of construction monitoring and testing, construction staking, quantity verifications, pay request verifications, final payment and job close out.

8/87 - 10/89

**DUNN COUNTY HIGHWAY DEPARTMENT**

Continued experience in all projects and project phases stated above as well as each phase of various highway maintenance activities. Responsibility in each phase ranging from initial project determination in conjunction with budgets. Planning, estimating, design, materials testing, construction supervision, crew supervision, and quality assurance, as well as inspection of projects in progress by consultants and contractors to assure quality control. Also project coordinating with other agencies such as State Department of Transportation, townships, villages and cities.

10/89 - 10/90

**ST. CROIX COUNTY HIGHWAY DEPARTMENT**

Held position of County Highway Engineer with continued experience and responsibilities as stated above, as well as interaction with various Committees from the local level to County, State and Federal government, Transportation Committees and County Boards, interaction consisting of presentation of information and response to questions and concerns.

10/90 - 04/03

**ST. CROIX COUNTY HIGHWAY DEPARTMENT**

Elected as the St. Croix County Highway Commissioner by the St. Croix County Board of Supervisors with continued experience and responsibility in each phase of highway construction and maintenance activities on the infrastructure system throughout St. Croix County. Also extensive responsibility in the administration and management of the St. Croix County Highway Department which has a total operations budget of + 12.5 million dollars. A very wide range of responsibility from personnel evaluation, hiring and termination, budgeting, budget administration, purchasing of materials and equipment, project administration, oversight and long range planning. Directly responsible to carry out the policy direction of the St. Croix County Transportation Committee and full Board of Supervisors in an effective and efficient manner in the best interest of the St. Croix County tax payers. Also extensive responsibility for state wide planning and programming. Also a member of various statewide committees and Chairman of the Wisconsin County Highway Association Bridge Committee. Responsible for setting policy and direction for the statutory obligations regarding all bridges throughout the state. In addition, see attached job description and Wisconsin Statute 83.01 pertaining to Highway Commissioner's position.

04/03 - present
